Sample and Methodology

The sample size was derived from the number of trips supplied in any given week, with separate sample sizes defined for each contract area, given the sample size the number of trips deemed appropriate to give a valid sample is stratified across the day types based upon their respective proportion in a given week.

Between the 1st July 2013 and 30th September 2013;

- **379** audits onboard Torrens Transit services.

The trips audited represent **2.2%** of the **16,905** trips supplied (defined as the number of trips available for five weekdays, plus a Saturday and Sunday) for one whole week Sunday to Saturday. The sample base is selected from trips listed on PTS approved timetables submitted by Torrens Transit.

Contract Area	Weekday Trips		Sunday Trips		Trips Supplied
	Audited	Saturday Trips Audited	Audited	Trips Audited	
Torrens Transit East West	318	32	29	379	16,905

Table 1.1

Main Findings

ON-TIME RUNNING

A vehicle in the course of a scheduled trip departs from a place nominated in the timetable (Timepoint) not more than 59 seconds before and not more than 4 minutes and 59 seconds after the time stated in the timetable as the relevant departure time.

In July - September 2013;

- **80.21%** of services audited were on time.
- **18.46%** of services audited were late.
- **1.32%** of services audited were early.

TRIPS RUN

A vehicle embarks on a scheduled trip from a terminus not later than the time stated in the timetable for the departure of the next scheduled service on the same route.

In July - September 2013;

- **0.00%** of services audited did not run.

CONNECTIONS ACHIEVED

A vehicle in the course of a scheduled trip arrives at a place indicated in the timetable with words such as “connect” or “transfer passengers to” or a symbol representing a connection, and meets the connecting service.

In July - September 2013;

- **No** services audited were required to connect.

VEHICLE CONDITION

Compliance with processes determined in accordance within the contract.

In July - September 2013;

- **98.4%** acceptable interior cleanliness.
- **99.7%** acceptable exterior cleanliness.

Main Findings

DRIVER QUALITY

Driver standards are audited in relation to courtesy, safety, appearance and assistance required.

In July - September 2013;

- **100.0%** acknowledging passengers.
- **100.0%** response to passenger enquiries.
- **100.0%** smooth ride.
- **100.0%** compliance with road rules.
- **100.0%** bus parked close to kerb as possible.
- **100.0%** ensured unsteady passengers seated before driving.
- **99.7%** acceptable uniform.
- **100.0%** acceptable personal appearance.
- **100.0%** acceptable personal behaviour.

PROCESS COMPLIANCE

Compliance with processes determined in accordance within the contract.

In July - September 2013;

- **100.0%** displayed destination sign.
- **99.2%** displayed shift number.

SIGNAGE - ONBOARD

In July - September 2013;

- **99.7%** displayed concession pass schedule.
- **99.7%** displayed metroticket fare schedule.
- **100.0%** displayed stickers for disability/elderly priority seating.

FARE EVASION

In July - September 2013;

- **1.38%** of passengers boarded the vehicle without validating a ticket.

When comparing the April - June 2013 quarter to the July - September 2013 quarter, fare evasion increased by **0.64%**.

Further breakdowns can be found throughout the report.

On-Time Running

Table 1.2

With the commencement of the new contracts, a bus is considered to be on-time if it departs a time-point along a route no more than 1 minute early and no more than 4 minutes and 59 seconds late.

In July - September 2013;

- **80.21%** of services departed on time.
- Early running occurred on **1.32%** of services.
- Late running was **18.46%**.
- Services reported as *Did Not Run* was **0.00%**.

Total	8		19		5.0%	4.9%

Table 1.17

On boarding a vehicle the Service Standard Officer will use a "Test Ticket" to assist in verifying the validity of trip data as set up by the driver on the vehicles "Bus Control Unit" (BCU). The information stamped on the test ticket is checked to ascertain that it contains the correct trip information including route and section information.

In July - September 2013

- Of the total trips audited, **5.0%** resulted in information displayed incorrectly on the test ticket. This resulted in **19** issues within Service Audit Reports (SAR's), of the SAR's raised:
 - The Validator was not functioning in **0.0%** of these trips.
 - An incorrect route was stamped on the test ticket in **57.9%** of these trips.
 - In **42.1%** of these trips the test ticket contained *Incorrect Section* information.
